To Whom This May Concern,

Testing Laboratory Silniční vývoj – ZDZ, spol. s r.o. is accredited by Czech Institute for Accreditation under number 1182 in accordance with ČSN EN ISO 1705:2005. We are using mobile retroreflectometer Delta LTL-M since summer 2011 to our full satisfaction with the instrument as well as service by technical and customer support staff.

Since 2011 up to date we estimate to have measured total of 60 000 km of road marking in the Czech Republic. Since 2014 our laboratory performs measurements of road markings with mobile instrument also in Austria of roughly 1 000 km annually.

Typically, we measure 7 000 to 10 000 km of road marking annually of which roughly 50% being measured directly for Road authorities (Czech Republic and Austria) and 50% for private contractors.

Sincerely,

Ing. Martin Toth.
